Goshen Coach celebrates its 25,000th bus

Elkhart, IN – Goshen Coach, a branch of Thor Industries Commercial Bus Division, proudly announces the production of their 25,000th bus.

National Bus Sales & Leasing, headquartered in Marietta, GA, purchased the 25,000th Goshen Coach bus. National purchased the unit for their customer, the City of Frisco.

“Goshen Coach provides durable, safe transportation solutions within my delivery timeframe which made them the right choice for my customer.” said John Smith, President of National Bus Sales.

Goshen Coach is represented by a nationwide network of dedicated dealers who work with each customer to customize the bus to his specific needs – from public transit to assisted living facilities, parking shuttles, churches and universities.

Goshen Coach is the industry leader in product quality and safety as evidenced by meeting the Ford Quality Vehicle Manufacturer standards (QVM) as well as ISO 9002 standards. Goshen Coach products are rigorously tested to meet or exceed Federal Motor Vehicle Standards including complete road and crash test, environmental rain booth test, vehicle roll over certification, brake tests, floor strength, seat belt pull away testing, and window pull testing. Goshen Coach ensures all buses exceed federal safety regulations.

Goshen Coach has been building special transportation vehicles since 1985. Since then, the company has become one of the leaders in the commercial bus industry. In May of 2005, Goshen Coach was acquired by Thor Industries Commercial Bus Division. This acquisition positions Thor to capture more than 45% of the small to medium size bus market. Goshen Coach offers a wide variety of floor plans, including wheelchair equipped buses, and several chassis options accommodating 12 to 39 passengers for transit and retail use.
